

**NOTES:**

1. Panels may be constructed using alternate gauge skins.
2. Panels may be constructed using a solid skin on both sides for "Sound Barrier" only characteristics.
3. Standard panels are uncoated galvanealed steel. Several factory finish paint coatings are available.
4. Panel barriers and enclosures can withstand wind loading of 100 MPH when used with appropriate structural steel supports.

**STANDARD ONB PANEL MODULE**

**PRODUCT LINE:** Panl-Wall® ONB Modular Acoustical Panels

**DETAIL:** ONB Panel Construction
