NOTES:

1. Panels may be constructed using alternate gauge and/or material body.
2. Bottom mounting channel is shipped loose, top mounting channel is shipped attached to panel.
3. Standard panels are uncoated galvannealed steel perforated with .093" diameter holes on .156" staggered centers for 33% open area. Several factory finish paint coatings are available including powder coating.
4. Optional encapsulation of panel acoustical fill available.
5. Optional sealed fill for Class 100 Clean Room use.
7. For installation the required clear height from the bottom channel equals panel length + 3".
8. Standard panel weight = 1.75 lbs/ft².
